Kestrel TSCM® Professional Software

Signal Intelligence Support System (SISS)™

The Kestrel Log Periodic (KLP)™ is an ideal low cost solution under the powerful Kestrel® brand, and is ideal for tactical deployment in virtually any type of Radio Frequency (RF) sweep environment, at all known and developing operational threat levels within the private or public sector security apparatus. The Kestrel Log Periodic (KLP)™ is a Canadian manufactured product, selected as part of a complete antenna system, with an innovative proprietary custom engineered, combination pistol grip and table top tripod. The Kestrel Log Periodic (KLP)™ antenna is a decidedly single antenna solution for both primary detection, collection, analysis and signal localization across the typical Technical Surveillance Countermeasures (TSCM) operational range in a modern threat model. The Kestrel Log Periodic (KLP)™ antenna kit is the result of significant applied Research and Deployment (R&D) efforts and significant operational testing and qualification standards by our Technical Research and Standards Group (TRSG)™.

Introducing the Kestrel Log-Periodic, Dual Polarization Wideband (High Gain) Directional Antenna with a unique custom engineered, combination Pistol Grip and Portable Tripod Mount, for Quick Field Deployment.

Technical Surveillance Countermeasures (TSCM) has Never Been this Easy!

The Kestrel Log Periodic (KLP) is a Canadian manufactured antenna, with excellent passive isotropic, characteristics.

Design (700 MHz - 6 GHz) Vs Near Field (10 MHz - 12 GHz) **

Key Features

- Low Profile
- Rapid Field Deployment
- Log-Periodic Design
- Extended Frequency Range
- Excellent Gain (11.14 dBi)

Key Features

v1.04.2016.11.19

** The Kestrel Log Periodic (KLP)™ offers an exceptional spectrum (design) range of (700 MHz to 6 GHz), which translates into a real-world (Rx only), Near-Field TSCM operational capability to well below 10 MHz, and greater than 10 GHz, making it ideal for indoor Direction-Finding (DF) applications, by minimizing the complexities of RF reflections and the effects of multi-path reception anomalies associated with strong near-field signals. A key feature of the KLP antenna is the innovative, custom engineered and manufactured (in Canada), quick connect pistol grip and tripod configuration that supports the antenna as both a tabletop collection antenna, and a comfortable exquisitely engineered, light weight component of a powerful Signal Intelligence Support System (SISS)™.

"Innovation is Simply the Beginning..."

Specification Overview

Model: Kestrel Log Periodic (KLP)™ Antenna
Application: RF Collection and Signal Localization
Frequency Range (Far-Field): 700 MHz to 6 GHz
Frequency Range (Near-Field TSCM): 10 MHz to 12 GHz
Isotropic Gain: Nominal (11.14 dBi)
Type: Log-Periodic (Directional)
Polarization: Vertical and Horizontal
Front / Back Ratio: Nominal (19 dB)
Impedance: 50 Ω
Connector: SMA (M)
Mechanical: 295 mm x 210 mm x 55 mm
Weight: 0.4 kg
Cable: Quad Shield Low Loss | SMA (M) Connector

Specifications are Subject to Change Without Notice...

"The KestrelPrey III™ and Kestrel Log Periodic (KLP)™ antenna minimizes the requirement for a separate broadband detector"

"Target hostile signals with the speed and precision of a kestrel!"

Kestrel Log-Periodic™ Dual Polarized Passive Directional Antenna

Kestrel TSCM® Professional Software Signal Intelligence Support System (SISS)™

The Kestrel TSCM® Professional Software is a leading, highly versatile and scalable Software Defined Radio (SDR), TSCM specific and operator centric application. The Kestrel TSCM® Professional Software is a 100% Canadian engineered and developed software application that is ideal for professional Technical Surveillance Countermeasures (TSCM) and Remote Spectrum Surveillance and Monitoring (RSSM) applications. Kestrel® is a full featured, low cost, standalone Signal Intelligence Support System (SISS)™ and is an ideal sensor based platform for RF based applications, including the detection, identification, signal analysis, signal localization, and interference analysis, for short and long-term RF collection requirements. Differential Signal Analysis (DSA)™ and Time Differential Signal Analysis (TDSA)™ are powerful comparative analysis tools. The Kestrel® Multiple Receiver Operation (MRO)™ capability is an industry first, permitting the real-time synchronization and hand-off of the spectrum and demodulation process, across any supported receiver or analyzer. When combined with the KestrelPrey III™ | Advanced RF Locator, the technical operator will soon become to appreciate the ability to deploy and powerful primary resource and easily transition to a walk-about RF locator utilizing the familiar TSCM® Professional Software for absolute precision and continuity. The KestrelPrey III™ | Advanced RF Locator is a low profile, travel friendly, portable RF collection and analysis platform that can be quickly field deployed. The Kestrel® brand, means a lot more than a lower cost of overall ownership, it brings new innovative features and methodology to the technical security market worldwide. In a modern TSCM threat model, due-diligence can no longer be realized without applying new techniques, and innovative equipment resources based on a new methodology. ✎

The Kestrel Log-Periodic™ Dual Polarized, Passive (Wideband) Directional Antenna was specifically selected for use with the KestrelPrey III™ | Advanced RF Locator as a versatile low cost, technically compatible product that significantly enhances the technical operators ability to capture the ambient RF spectrum environment, in an Omni-Directional, vertically polarized tripod configuration, and quickly and easily transition to a powerful walk-about, highly directional Pistol Grip, Signal of Interest (SOI) locator, minimizing the requirement for a separate broadband RF detector.

The Kestrel® Log Periodic (KLP) antenna system, is delivered as a complete Rapid Deployment Kit (RDK) that is ready to deploy in virtually any TSCM or spectrum analysis application. The RDK includes a Log Periodic Antenna with a fixed, quad shielded RF cable, terminated with an SMA (M) connector, and a pre-installed quick disconnect Pistol Grip and Tripod Configuration, packaged in a travel friendly soft case.
